

Property type : Plot

Swimming pool : No

Plot area : 9245157 m²

Location : Ronda

Bedrooms : 0

Bathrooms : 0

Company for sale which includes nearly 1.000 hectares (measured by gps) of land only 5 minutes drive from the historical town of Ronda. The lot is so big that the municipality of Ronda just isn't big enough. The lot is also part of the municipalities Júzcar, Cartajima & Alpendeire.

The project offers you, as a buyer/developer, an endless range of possibilities. It is already allowed to construct 218.000 m² (21,8 ha) of floor space on the 545,3 ha of the estate that is situated in the municipality of Ronda. This development permission of the Ronda townhall comes with the designation of "Turístico y Social sobre Actuación Urbanística". Luxurious villas, a hotel, bungalows, studio's, a shopping mall with surrounding service centers such as a gas station, sport and health centre, wellness complex, hunting lodges and even a camping site, form all part of the alternative options for a tourist complex based on the municipal decision.

It is to be expected that general purpose facilities such as swimming pool and tennis courts, but also a possible petrol station and alike (as health care centre) can be constructed on top of the área mentioned in the permit, so that the allocated surface of 218.000 m² can probably be fully dedicated to living quarters (bungalows, lodges, apartments and hotel accommodation).

N.B In addition, and as an option parts of the land can be utilized for a "Green energy project" which would entail windpower plants as well as solar panels.

A partially renovated typical spanish "Cortijo" with storage spaces, a stable for 10 horses and a garage for four cars, completely equipped with running water and electrics. A main building of about 440m² with several bed and bathrooms, a big paved, tiled terrace and an outdoor solarheated pool, along with a separate guesthouse near the pool. Industrial complex based on concrete underground of aprox. 1.500 m², of which 1.105m² is built on. Equipped with running water and several powersupplies.

A broken-down farmhouse of about 150m² on a distance of 2kms away from the main road which is suitable for restoration or renovation with its own independent water supply.

Also an 80m³ water reservoir with a submersible pump at a depth of 75 mts is present and is supplying of drinking water. This installation can supply irrigation for for 10ha of the flat meadows or other agricultural use.

There are also hunting rights connected to the land. Wild pigs, deer, mountain goat, pheasants etc. Good to know, should hunting be part of your concept.

All plans and licenses will have to be obtained at the buyer's expense
